

ACOUSTIC PANEL

TUCK IN SYSTEM

Our Tuck In System is for creating fabric wrapped acoustical panels on walls or ceilings.

Mounted directly to walls or ceilings, fabric is held taut and secured by locking UPVC tuck in track. They are available in a variety of profiles and sizes.

It integrates with any subsurface materials (Rockwool, Fiberglass, Foams, etc) and conforms to a variety of shapes. Future redecorating or replacement is simple.

The system shall remain in integral part of the design as long as practicality is concerned.
