FIRE RATED METAL DOORS

Up to

4 Hours Fire-Rated

Proven Performance with

Laboratory Test Evidence

Product Data Sheet

SIAC Metal doors are factory-assembled and diligently tested for alignment, fit and functionality.

SIAC doors are used mainly in offices, factories, warehouses, train stations, expressways, oil and gas plants and marine industries where high durability and weather resistant is needed.

Doors can be fabricated as single or double leaf systems with vision panel as optional. We manufacture, supply and install high quality reliable fire-rated and non fire-rated metal door sets for commercial, industrial, residential and institutional.

The doors are tested in accordance with:

SS 332:2018, BS EN 1634-1-2014 + A1:2018 for fire performance
